

WATERFRONTToronto

Help Shape the Future of the Port Lands

Waterfront Toronto and the City of Toronto are creating a business and implementation plan for the Port Lands Acceleration Initiative, and want the public to be part of the process.

Given the amount of information and its complexity, this round of consultation will be a two-step process. Key findings and preliminary options will be presented at an open house drop-in session on March 31, and then public input and comments will be sought at two identical workshop meetings on April 3 and 4.
