

central waterfront update meeting

Learn more

The transformation of Queens Quay is well underway. Part of an award-winning plan to make the central waterfront a world-class destination, Queens Quay is on its way to becoming the grand waterfront boulevard Toronto deserves.

Progress Report

Construction crews are making steady progress and the project is on track for its Spring 2015 completion. Over the past several months, crews have been upgrading Hydro infrastructure, rebuilding aging storm and sanitary sewers and preparing to rebuild the TTC streetcar corridor.

Join Waterfront Toronto on May 8, 2013 for a detailed construction progress report. Learn more about:

- Construction activities to date and our overall construction schedule
- The types of construction to expect this spring and summer
- Traffic management and TTC service to the waterfront

We'll also provide an overview of other Waterfront Toronto revitalization projects underway in the area. A question and answer session will follow.
