CONSTRUCTION NOTICE: Cherry Street Stormwater & Lakefilling

Construction activities for the next few weeks will be concentrated on in-water work and have little impact on the local traffic.

This week, crews are installing buoys around Essroc Quay to mark the location of the berm we're building. This berm will surround and protect the new landform we're creating. The core stone (aggregate) to build this berm will be delivered by boat. The first deliveries are scheduled for this month.

WHAT TO EXPECT DURING CONSTRUCTION:

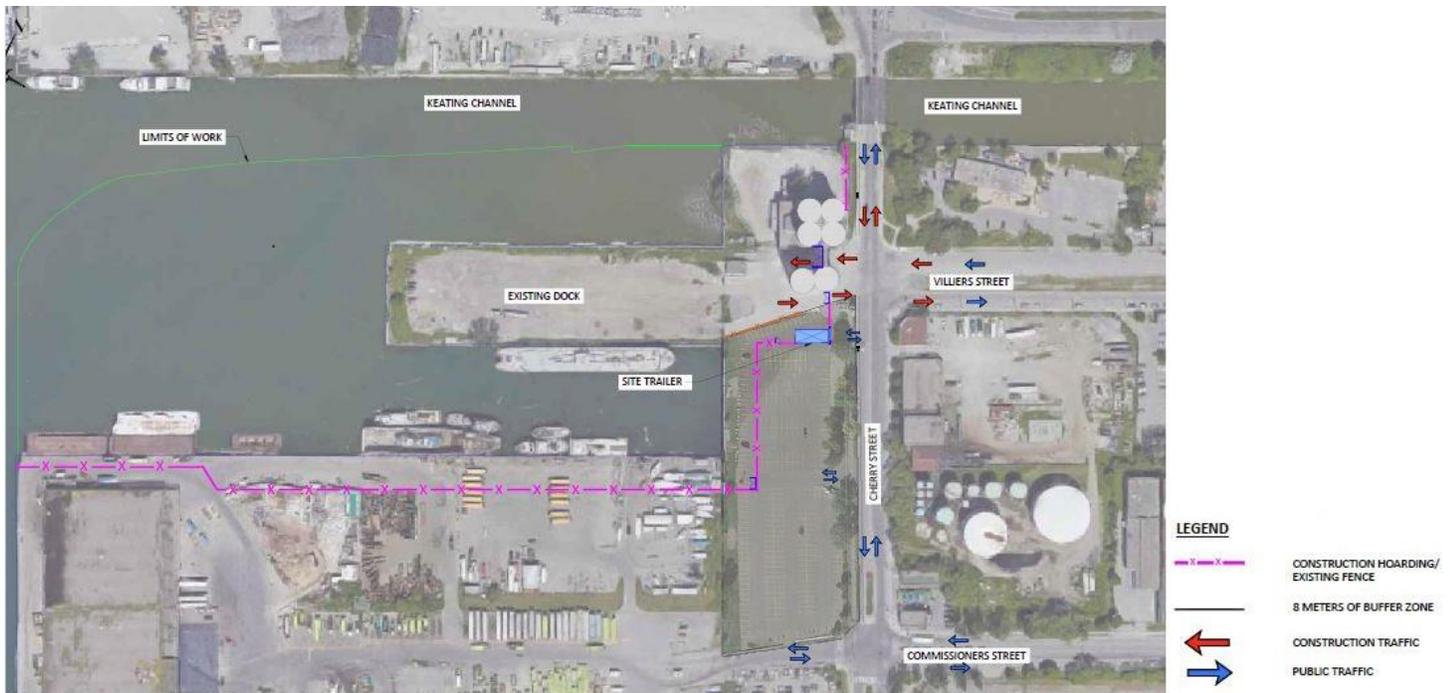

For the next several weeks, work will be concentrated on site, with little impact on traffic or public spaces.

The first shipment of materials is scheduled for this month. These shipments can come in at any time during the day. We are making every effort to minimize the amount of work outside of regular business hours. However, there is a chance that some shipments may be unloaded during nights and weekends. This activity will comply with noise standards specified by the City through its permit application process.

PROJECT SCOPE:

We're creating new land around Essroc Quay – this will make room to realign Cherry Street and build a new Cherry Street Bridge over the Keating Channel, part of a plan to better manage stormwater and avoid flooding during major storms. As part of this project, we're also building new fish habitats. This project will be completed by March 2019. This work is part of the Port Lands Flood Protection project. For more information about Don Mouth Naturalization and Port Lands Flood Protection, visit <http://tiny.cc/DMNP>

The site is located at Essroc Quay on the south side of the Keating Channel, where it meets Toronto's Inner Harbour. The following graphic shows where construction hoarding and fences will be installed, as well as the flow of traffic to and from the site.

JOIN THE CONSTRUCTION LIAISON COMMITTEE

We’re looking for community representatives to join the Construction Liaison Committee (CLC) for this project.

CLC members are required to participate in regular meetings with the construction manager and project team. The frequency of these meetings will be determined based on need. The project team will provide construction updates and members are asked to provide feedback, advice and recommendations. CLC members will bring forward advice, issues and/or comments on behalf of the organization or community they represent, and communicate back to those groups.

If you would like to apply to join the CLC, please email info@waterfrontoronto.ca and tell us which group you represent. Please note that the CLC is designed to be a small, focused committee. Members will be selected based on their ability to liaise with the communities/constituencies and project team.

QUESTIONS:

For more information about this work, please visit <http://tiny.cc/CSLFproject>. Use this [online form](#) to send us questions or concerns about construction: <http://tiny.cc/CSLFpublicinquiries> or email us at plfp@ellisdon.com. For urgent construction related issues, please contact Cameron Coleman, EllisDon, at 416-464-3583.
