CONSTRUCTION NOTICE #8: Phase 1A Jack Layton Ferry Terminal and Harbour Square Park

Construction on Phase 1A of the Jack Layton Ferry Terminal and Harbour Square Park project is scheduled for completion in early April 2019.

Installation and electrification of 11 new light fixtures throughout the park were completed in December 2018. Soil cells that support and protect the successful root growth of future tree plantings along the promenade were also completed January 2019. Grading of the site is now being finalized in preparation for laying the signature granite mosaic path.

What to Expect During the Final Phase of Construction

Construction staging around three zones within the site have been present since early October 2018 and will remain throughout the final leg of construction.

Ferry Terminal & Park Access

During construction, visitors are asked to access the ferry terminal from Bay Street and Queens Quay using the western walkway. Signs have been placed on site to help visitors navigate their way to and from the ferry terminal and park.

Periodically, trucks will need to access the site by crossing the Queens Quay pedestrian promenade and Martin Goodman Trail at Bay Street. During these times, flagmen will be on site to safely direct pedestrians and cyclists.

Please refer to map on page 2 for full site access map.

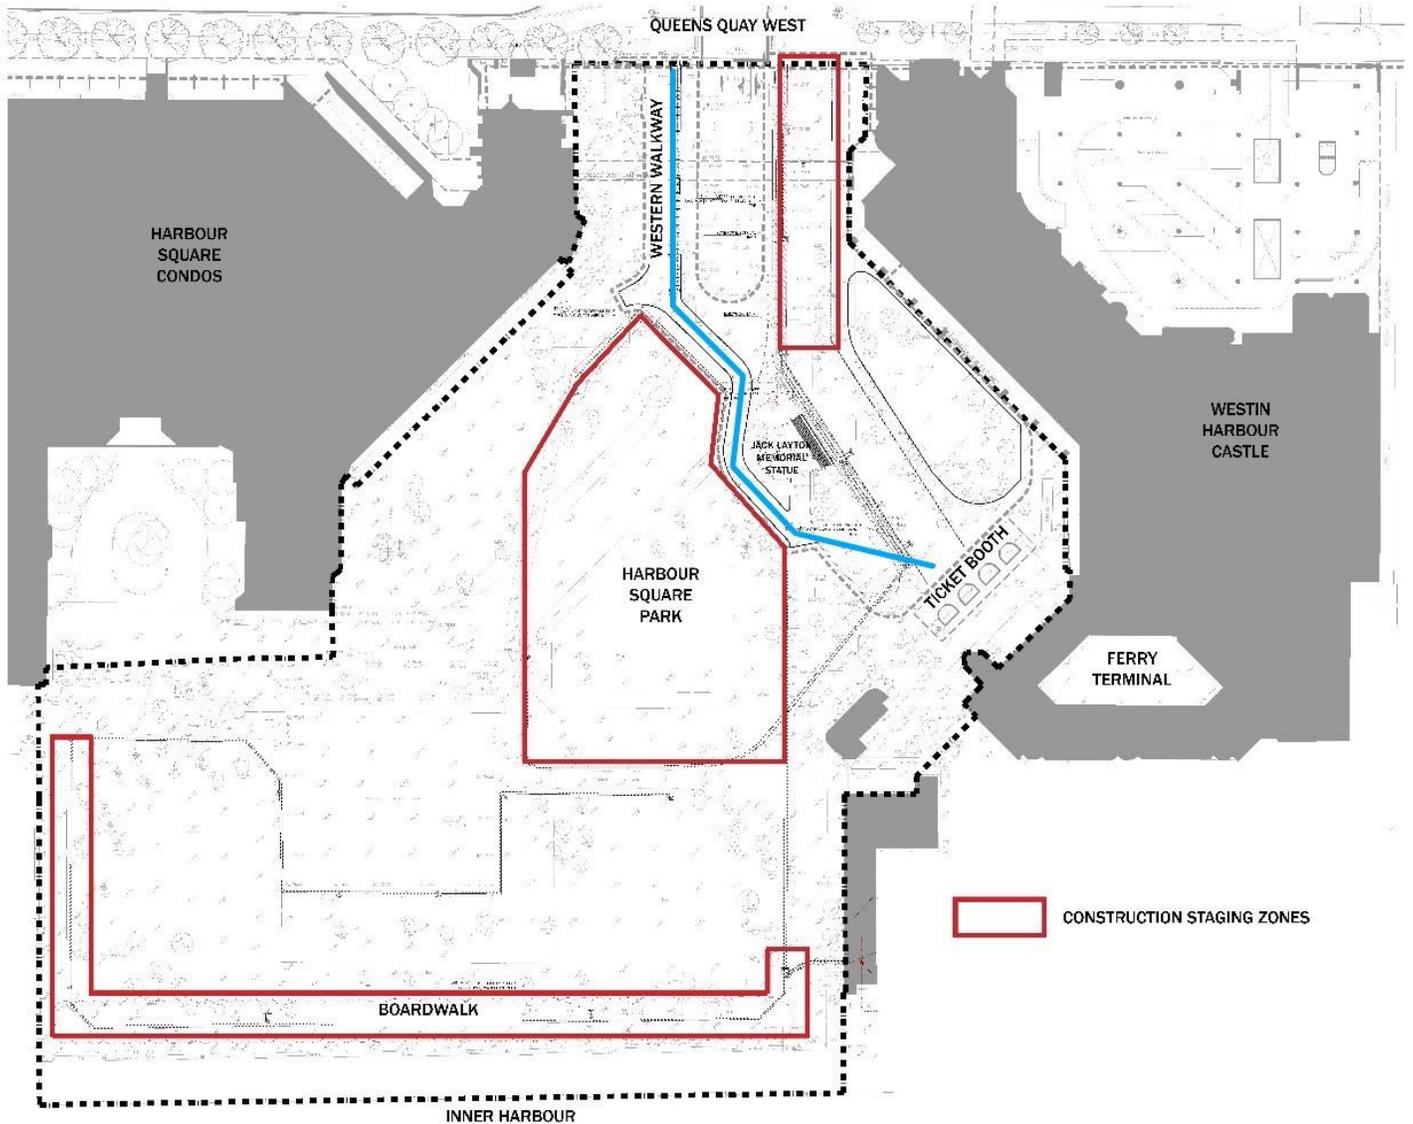

Completion

Upon completion, the public realm outside Jack Layton Ferry Terminal will feature a 106 linear metre promenade leading visitors south from Bay Street to the ferry terminal. This promenade features our signature two-tone granite maple leaf mosaic that will unify the entire water's edge of the waterfront. The area will see improved views of the water's edge from Bay Street and illumination for evening users with the installation of light fixtures throughout the park pathways. The newly installed double row of trees along the promenade will also form a natural canopy archway that will enclose the entrance and park paths once trees reach maturity.

Construction of Phase 1A of this project is scheduled to be complete in early April 2019.
