DISCUSSION WORKSHEETS

The key elements of the Lake Ontario Park Concept Plan are:

- the use of “**transects**” (long, primary paths that serve as circulation spines) and “**outposts**” (secondary paths that allow people to explore and reach shorelines, lookouts, piers and other elements);
- the creation of an undulating, dune-like **Bar** feature that traces the location of the former Fisherman’s Island; and
- the re-creation of **wetlands** at Coatsworth Cut/Ashbridges Bay to improve water quality in the Lake and provide habitat.

With the group, please discuss each of these elements and answer the following three questions.
