CONSTRUCTION NOTICE #10: Queens Quay East Interim Improvements (Lower Jarvis to Parliament)

PROJECT UPDATE

Major construction work for the new Martin Goodman Trail and sidewalk on the south side of Queens Quay is complete, including line painting and landscaping.

Municipal Services Work

Now that the Pan Am and Parapan Games have drawn to a close, work has resumed on the sanitary trunk sewer from Bonnycastle Street and Queens Quay to the sewage pumping station in the east. This work involves rebuilding the existing storm sewer from Bonnycastle to Small Street and installing twin storm forcemains from Bonnycastle to Parliament Street.

While this work is being completed, westbound lanes between Bonnycastle and Small will be closed. East-west traffic will flow along the south side of Queens Quay. While these lanes are closed, we will preserve access to all properties in this area. A work schedule and traffic management plan will be circulated by next week.

For more information about this work, please email info@waterfrontoronto.ca or for urgent construction issues, contact Ed Sarsam, PCL Constructors Canada Inc. – (416) 677-9287.
