CONSTRUCTION NOTICE 2: Aitken Place Park

Construction on Aitken Place Park began in the fall of 2018. Removal of the former Marine Terminal 29 warehouse foundation and remaining portion of the parking lot was completed in December and construction crews have since completed the installation of below grade sewers and water services, along with much of the park's earthworks.

Over the next several weeks, crews will be focused on completing a number of hardscape features throughout the park. This includes laying out and pouring the curb walls, central walkway, stairs and the foundation for a permanent public art installation called *LIGHT KEEPER*. The perimeter fencing for the dog relief area located at the north end of the park will also be installed this month.

The water's edge promenade south of Aitken Place Park and Aquavista remains secured and closed off until construction is complete. The park is scheduled to be complete and open for public use by September 30, 2019.

When complete, Aitken Place Park will be a multi-purpose park space connecting Bayside to the broader East Bayfront community. This 0.75 acre park is located just north of the Water's Edge Promenade along Lake Ontario and east of Lower Sherbourne Street. The park is framed by two local roads—Edgewater Drive in the north and Merchants' Wharf encircling the park site. The southern edge of the park will provide uninterrupted views of Toronto's eastern harbour.
