

PUBLIC NOTIFICATION OF PROJECT

New Sanitary Sewers along Queens Quay East, Lower Jarvis Street, and The Esplanade

New Storm Sewers along Queens Quay East

Project Background

Waterfront Toronto is conducting a Class Environmental Assessment (EA) for construction of new sanitary and storm sewers to service proposed re-development within the East Bayfront Precinct. The existing sewers do not have sufficient capacity to meet the servicing requirements of the ultimate build-out of East Bayfront.

The purpose of this project is to provide sustainable servicing for East Bayfront while minimizing disruption to the public. The proposed sanitary sewers will extend outside of the East Bayfront Precinct, ultimately conveying the wastewater flows to the City of Toronto's Scott Street Sewage Pumping Station, located at the intersection of Scott Street and The Esplanade. The proposed storm sewers will be constructed within the East Bayfront Precinct, along Queens Quay East.

The Process

The Municipal Class Environmental Assessment ("Class EA") process (amended October 2007) is approved under the Ontario Environmental Assessment Act and allows municipalities to follow a Class EA process when undertaking municipal infrastructure projects. This sanitary sewer construction project is being carried out as a Schedule A+ undertaking. This project is therefore pre-approved under the Class EA by the Ministry of the Environment and the project can be implemented upon public notification of the project.

LOCATION PLAN

Construction Schedule and Phasing

Construction of the sewers is tentatively scheduled to begin in mid-2010. The proposed works will be undertaken in three phases, as follows:

- **Phase 1 (Queens Quay East):** Work tentatively scheduled to commence in August 2010. Duration of 6 months.
- **Phase 2 (The Esplanade):** Work tentatively scheduled to commence in September 2010. Duration of 7 months.
- **Phase 3 (Lower Jarvis Street):** Work tentatively scheduled to commence in August 2010. Duration of 10 months.

A Construction Notice with additional information will be issued to properties in the project area prior to the commencement of construction as well as in this newspaper.

Project Contacts

If you have any questions or comments about the project please contact one of the following for more information:
