CONSTRUCTION NOTICE #5: IN-WATER PIPES IN EAST BAYFRONT

Background

Waterfront Toronto has begun work on the final piece of a large Stormwater Management System that services East Bayfront, the West Don Lands and future communities north of the Keating Channel.

The final piece includes construction of in-water pipes along the section of the Water’s Edge Promenade (WEP) spanning the foot of Sherbourne Common from approximately Dockside Drive to the southern point of 15 Merchants’ Wharf, also known as the Aqualina at Bayside condos. When complete, the in-water pipes will help convey stormwater to the Cherry Street Stormwater Management Facility where it will be treated to remove pollutants before the water flows to Lake Ontario.

Updates:

Timeline

Due to the extreme cold weather causing early ice buildup and high wind speeds experienced in December 2021 and January 2022, the construction schedule for the in-water pipes has been impacted. As a result of the extreme weather conditions, the anticipated completion of the project has been delayed to December 2022.

Weekend Construction

To help reduce further delay in completion of this project caused by extreme weather conditions, our contractors will be working every Saturday beginning Saturday, January 15 through Saturday, March 26, pending appropriate weather conditions.

As per the City of Toronto’s bylaw, construction work on Saturday will take place between the hours of 9 a.m. -7 p.m. on the waterside of the Water’s Edge Promenade, with a typical day ending closer to 5:00 p.m.

During this period, moderate construction noise is expected as well as vessels in the water. Pedestrians and cyclists will still have access to the full length of the WEP during this time.

About the Stormwater Management System

For more information about the Stormwater Management System, the Cherry Street Stormwater Management Facility and how the in-water pipes connect to this system, please refer to [this post](#).
